

Rota 2012 Sint-Lodewijkscollege Bruges

workshop: **Arts and fashion**

We get dressed. We get undressed.
It's cold. It's hot.
She likes red. He likes green.
She is black. He is white.

In 2050, we will only have 5 articles of clothing and 1 pair of shoes.
Adapted to all kinds of weather situations and made for all occasions.
A variety of cultures coming together, capable to suit everyone's budget.

During four workshops, we're going to design clothes which combine all of these ideas.
Different materials such as textiles, newspapers, wrapping paper, plastics, plastic and paper bags, wool, ribbons, rope, buttons, needles and thread, staples, clips and paint will be used.

Day 1: designing clothes, looking for materials, cutting patterns

Day 2: making clothes and trying them on

Day 3: making and painting clothes, trying them on + discussing concept of "the catwalk"
(e.g. what do we need etc.)

Day 4: organizing our show, placing decorations and accessories (bags, materials etc.)
practising walking down the catwalk
